

PUNJAB MINERAL DEVELOPMENT CORPORATION

No. Expl-301(10)/85/4045

Dated: August 28, 1988

COMPLETION/PERFORMANCE CERTIFICATE

This is to inform that Indus Valley Construction Company Limited worked for us for the exploration of rock salt areas in the Salt Range. They have completed the assigned job to our entire satisfaction.

Despite difficult field conditions, IVCC maintained a satisfactory progress of work. They have in all cases been able to recover over 95% of core while drilling through weak and fractured horizons. In their present assignment with us, they successfully have completed the drilling of fourteen (14) bore holes involving about 7576 ft of drilling. Being satisfied with the expertise and the performance of IVCC and their staff we have no hesitation in recommending IVCC for carrying out exploratory drilling for rock salt or any other mineral under difficult field conditions.
